CONDITION OF THE MARKETS

"Bears" Finally Succeed in Getting Control of the Speculative Wheat Pit.

May Forced Off 13-8 and July 11-4 Cents from Closing Prices of Monday-Bulge Followed by a Drop-Other Articles Weak.

MONEY, STOCKS AND BONDS.

The Upward Tendency of Prices Materially Checked by the "Bears."

NEW YORK, April 21 .- Money on call was easy, ranging from 3 to 5 per cent., the last loan being made at 3, closing offered at 8.

Prime mercantile paper, 5@7 per cent. Sterling exchange quiet and steady at \$4.8514 for sixty-day bills and \$4.8812 for

demand. The total sales of stocks to-day were 840,595 shares, including the following: Atchison, 17,187; Lackawanna, 11,570; Lake Shore, 4.880; Louisville & Nashville, 4,795; Missouri Pacific, 11,535; Northwestern, 4,311; North American, 3,160; Northern Pacific, 7.810; Northern Pacific preferred, 20,670; Richmond & West Point, 7,095; St. Paul, 52,219; Union Pacific, 33,650; Wheeling & Lake Eric, 3,650; Wheeling & Lake Eric pre-

The stock market met with a check to-day, both as regards its strength and its activity, though the firmness of its tone was not imthough the firmness of its tone was not impaired for a moment. The execution of stop orders gave the "bears" an opportunity to attack some of the leading shares with success, while realizations of profits accrued on the advance of the past few days aided in unsettling for the moment the confidence of the bullish feeling in the street. The local operators, as a rule, are known to be fighting a rising, and while reactions are always to be expected in a general advance, there was nothing to-day which could be called a was nothing to-day which sould be called a reaction, even with the conjunction of all the forces which may be arrayed against the upward movement. A halt occurred, however, which had the effect of making many would-be buyers pause, and the volume of business, after the realizing sales of the forenoon, became materially smaller than that of the last few days at that time of day. There was rather a larger foreign demand than usual, and the Western demand was still prominent, while those in position to know say that there has been no change in position among the Western operators, but the effect of the sales was most apparent in the Western stocks, though the entire market felt the influence. A further engagement gold for export was not without its effect also, but the tendency in the street is to disregard the movement of specie outward, and beyond offering a little additional encouragement to the bears," it was soon forgotten. The trading, however, was better distributed, and the stubborn resistance to the depressing influences kept prices generally within narrow limits and finally forced a retreat on the part of the advocates of lower fig-

The weakest points in the list were natnrally those which have had the greatest advance, such as Chicago Gas and Rock Island, though there was, for the amount of business done, considerable weakness displayed at times in Lackawanna. Among the specialties Oregon Short-line followed the bonds and rose sharply, and among others may be mentioned Wabash pre-ferred and Richmond & West Point preferred, and Wheeling & Lake Erie preferred, which was aided by the increase in the dividend rate as promised some time ago. New England also became prominent by a spurt in the afternoon, inexplicable as usual with the movement in that stock. A steady opening was followed by a general selling move-ment which forced prices off from 4 to 34 per cent. But after this had spent its force there was a complete rally, but the con-tinued efforts of the professionals to force a decline kept the market rather feverish through the day, and the general tendency of prices was downward. The market finally closed fairly active and heavy, but with promise for to-morrow, while prices were generally small fractions under those

of the opening.
Railroad bonds were fairly active, and again displayed a firm tone as a rule, though the movements were not on so large a scale as those of yesterday. Oregon Improvement fives continued active on a statement of a large increase in the net earnings for the first quarter of 1891 as compared with the corresponding quarter of 1890. Government bonds were dull and steady. State bonds were dull but steady. Clos-

## TRADING AT CHICAGO.

past the "bulls" in the wheat pit have had

"Beers" Turn the Tables on the "Bulls" and Force Prices Down. CHICAGO, April 21.-For several days

everything their own way, and the unlucky "bears" have been gored and tossed unmerpifully. It was the "bears'" turn to-day. and they improved the opportunity by giving their opponents a rib-cracking squeeze. The net result of the day's trading was a decline in the price of May wheat of 1380 compared with the closing price vesterday. and of 33sc from the highest point reached to-day. July declined 14c compared with yesterday's close, and So from the highest of the day. The weakness in the leading cereal was taken advantage of in the other speculative pits to depress prices, and, as a consequence, comparing prices with the closing figures yesterday, corn is off 13,0 120, oats 34c, pork 30c, lard .10c and ribs .20c. The day started in with a fine prospect for the continuance of the "buil" cam-paign. The early cables indicated decided-ly higher prices abroad and commissionouses were overwhelmed with buying orders. The result was that around opening prices were from le to 2c higher than at the close yesterday. That was the high point for the day, however. Roche, Linn, Driver, Bloom and all of the older heads among the "bears" seized upon the opening bulge as an opportunity to sell. They called the marked successfully. It sold shortly after noon nearly 3c below its early high point and during most of the session was 112c to 2c off from top figures.
A great deal of "long" wheat held on thin
margins was dumped overboard on the declines which afforded the "short" sellers an excellent opportunity for taking in their profits. The "bears" were materially aided by reports from New York, Milwaukee and St. Louis that wheat bought for export was being resold because prices were above the export point and that prominent houses with foreign connections in the firstnamed city were operating on the "bear" side in the June and December futures. Aside from these dispatches and the cables there was little news affoat. Roche had s lispatch from Round Lake, which said the anring wheat there was up and growing nicely. Other advices from various parts of the Northwest were contrary. me said that little seeding had been done. The export clearings were quite small. Once started downward the market showed small recuperative power, and, with a few rallies on realizing purchases, continued to

broke to \$1.1112 on sales by Bryant, Roche, Linn and Driver, and was then lifted to \$1.1234 by purchases of these sellers, who were taking profits, and by Hutchinson and White & Co. The selling on the bulge was by the same people who engineered the first break. The raid carried it down to \$1.1118. Closing cables from Liverpool and Antwerp were so much higher that it rallied to \$1.1218, but renewed selling sent it down again to \$1.1078, the lowest point of the session. May started at \$1.15 @1.16, and, following the July future, touched \$1.1258 as the low point. Corn was weak from the start. July started out with sales from 6914c down to 6878c, and subsequently declined to 6738c. The "longs" were disposed to let go of their holdings, and there was a little more disposition among the "bears" to sell short. Oats were \$1.1234 by purchases of these sellers, who and there was a little more disposition among the "bears" to sell short. Oats were quiet and rather uninteresting. The market did little more than follow corn, closing at the bottom prices of the day. The market for provisions opened easy and without excitement, at some decline from the closing prices of the previous day, and continued in a drooping condition during the entire session, being at their lowest prices for the day at the close. The leading futures ranged as follows:

INDIANAPOLIS MARKETS. Trade Brisk, Prices Firm, Covers the Local

INDIANAPOLIS, April 21 .- Spring activity is the leading characteristic in most departments of trade, and with this the tendency to firm prices is unusually marked. "In dry goods the movement is now very satisfactory," said one of the oldest wholesale men in this branch to-day. "We have no room for complaint of the volume of our business. Competition is sharp and margins close, but as few bad debts are made we can afford to sell close." In groceries strong prices rule, both sugars and coffees being upward in their tendency. Sugars are very hard to purchase in quantities desired. The provision market is active; prices firm at the revised quotations of Monday. The flour market is more active, and better prices realized than at any time in the last three years. While poultry and butter are both weak at quotations, eggs are scarce and advancing in price. Vegetables are easier, so much green stuff is now coming on to the market. Green apples are about off the market, no really good fruit being offered. Irish potatoes are still in light supply, but the de-mand is slackening, and higher prices will hardly be reached. Other markets present no new features.

Receipts of wheat are light, and practically nothing is doing, prices not seeming to increase receipts at this point. Corn is firm. Oats are in light demand, and prices easier. Track bids on the several cereals to-day ruled as follows:

A Cheap Silo.

The following relates to the silo at the Maryland Agricultural Experiment Sta-

tion, and is from a bulletin of that institu-

tion: The silo is a simply-constructed

"lean-to," on the north side of the college

cattle-sheds, thirty-eight feet long and thirteen feet wide. Its average height

above ground is from seven to eight feet,

and it is excavated to an equal depth

compartments or pits,

two feet square inside and about

fifteen feet deep. The westerly slope of the cattle-shed roof is extended to

cover all. The sides of the underground

part have eight-inch retaining walls of brick. All the rest of the structure is of common rough lumber, except the interior

linings of the pits; this is of narrow matched ceiling pine lumber, dressed and put on vertically, from top to bottom. Every piece of this lining was thoroughly coated with creosote oil before being put in place. The lining covers the interior

faces of the brick wall, so that the

silage may be in contact with wood, a non-conductor of heat, instead of brick. \* The three divisions or

pits have a storage capacity of a little more

than thirty tons each of well-packed silage,

or over ninety tons in all. The total cost of the silo was \$245, or about \$2.63 per ton of capacity. This cost might have been re-duced at least \$100 by omitting the brick

walls of the pits and using a cheaper grade

of lumber. As built, however, the sile is substantial and will last for

years. The experience of two sea-

has proved the structure quite satis-

factory for its special purpose. This silo,

although easily built and comparatively inexpensive, fulfills the essential require-

ments for a suitable pit for storing silage.

First, it conforms to the existing local con-

ditions; in this case it is an addition or

attachment to a set of cheap cattle-sheds,

rather than an independent structure.

filled and emptied. And it has the needed

strength to retain all lateral pressure; it is

air-tight, frost proof and sufficiently drained. The crops used for silage in 1888, and their maturity,

were as follows: A strong-growing, heavy-foliaged, semi-dent white corn; common to the vicinity, the kernels glazed,

sorghum, with seed in the dough, the varieties being Chinese and Early Orange

cane; and the soja bean, pods formed, but

seeds not fully developed. In 1888 the main crop grown for silage was corn. That

year it cost \$64.40 to harvest and store

forty-five tons of silage, or \$1.43 per ton.] It was estimated that the tangled condition

of the corn in the field fully doubled

the labor of cutting and loading it, and had the feed-cutter been larger

the same engine and fuel could have

doubled the quantity cut per day, although another cart would have been

needed in hauling. It is easy to see how

these improvements might have reduced

the cost of storing per ton to about \$:. [In a note by the director it is stated that

thirty tons and 1,500 weight of silage were stored at the Houghton farm in 1883 for

\$44. or \$1.47 per ton. | For purposes of weighting, in 1889, heavy sticks of oak cord-

wood were used, and found convenient and

affective. The experience of this station

is in favor of weighting moderately, as

with brick in 1888, and fire-wood the next

year, both at the rate of thirty to fifty
